

NEWSLETTER EDITION: JULY

Stay Ahead Of The Curve: Introducing Our Bi-monthly Newsletter

Dear Students, Parents, and Staff,

I am thrilled to introduce our brand-new newsletter, a vibrant platform that will keep us connected, informed, and inspired.

Get ready to embark on a journey of knowledge, growth, and endless possibilities. Together, let's make every edition of our newsletter an enriching experience.

Welcome Aboard!

DISCOVER A WORLD OF INSPIRATION AT AUS AND STAY AHEAD OF THE CURVE WITH OUR ELECTRIFYING NEWSLETTER.

Investiture Ceremony 2023-24

IGNITE THE CHANGE, LEAD THE WAY

WELCOMING OUR NEW BOARD OF HONOURS!

At Ashoka, Investiture Ceremony is not just about providing titles, rather its about conferring responsibilities to the students, to take charge of the school and take it to new heights.

Kargil War veteran and an inspiration to many, Nayak Dipchand was present as the Chief Guest for this celebration.

**FOUNDERS' DAY
CELEBRATION
2023**

"CELEBRATING VISION AND VALUES THROUGH SEVA"

Giving a heartwarming tribute to our visionary Founder and Chairman, Mr. Ashok Katariya, this year's Founders Day was celebrated with a Seva theme, embodying the core principles of Sampark, Sahyog, Sanskar, and Samarpan. The event showcased our institution's commitment to these pillars, reflecting the values he ingrained in us, as we paid homage to his enduring legacy.

JUNE - JULY

Sharing Day

International Logiquids Olympiad

Sensory Day

World Paper Bag Day

World Tiger Day

SOME REFLECTIONS OF OUR VALUES - 'SEVA'

ARTIFICIAL INTELLIGENCE, A CURSE...

Artificial Intelligence (AI), a rapidly evolving field of Computer Science has undoubtedly revolutionized numerous aspects of our life. However, amidst its promises of process and efficiency. This essay explores the darker side of AI, highlighting its potential to become a curse rather than a boon for humanity.

One of the most significant concerns surrounding AI is its impact on employment. As AI continues to advance, there is a growing fear that automation and intelligent machines will replace human workers across various industries. This could lead to massive job losses, unemployment crises and socio-economic inequalities. Additionally, the concentration of power is in the hands of a few tech giants who control AI development may exacerbate these disparities creating a scenario where wealth and resources are controlled by the selected while majority are struggling to make a living.

A famous Italian Philosopher Yann Lecun says, "Our intelligence is what makes us human, and AI is an extension of that quality".

The armament race around 1910-1914 caused the most terrible war in world history, which was the First World War. It is high time to understand the fact that even an "AI weapon" race can be initiated, which may result in another disastrous war. Elon Musk said that countries should develop AI, rather than "tools or weapons". This can cause a great risk of another war in history.

In a research laboratory of Japan, four AI robots killed 29 scientists. This case was highly infamous and had been kept a secret, but through social media platforms it came into light when Linda Howe, a journalist gave the evidence through a video clip.

Another press issue associated with AI is its potential to erode privacy and personal freedoms with the proliferation of AI – powered surveillance, facial recognition and data analytics, our lives are increasingly being monitored and analyzed.

AI systems are only as good as the data they are trained on, and if the data contains inherent biases or reflects societal prejudices AI can amplify these biases leading to discrimination and unfair practice. Additionally, the lack of transparency in AI decision making processes makes it difficult to hold AI systems accountable for their actions, further deepening concerns about ethical principles.

While AI has the potential to offer incredible benefits to society, we must approach its development and its implementation with caution. The curse of AI lies in the possibility of widespread unemployment, loss of privacy, erosion of personal freedom and perpetuation of biases. It is essential to address these concerns, regulate AI development, and ensure that it serves the best interest of humanity rather than a curse unleashed upon us.

जिंदगी

छोटी सी है जिंदगी,
हर बात में खुश रहो...
जो चेहरे पास ना हो
उसकी आवाज में खुश रहो...
कोई रूठा हो आपसे,
उसके अंदाज़ में खुश रहो...
जो लौट के नहीं आने वाले,
उनकी याद में खुश रहो...
कल किसने देखा है,
अपने आज में खुश रहो...
